Pexip Professional Services

Infinity Design

Full control, unmatched capabilities

When you want full control over your video conferencing infrastructure and media, you choose Pexip Infinity. It is a software-based self-hosted video conferencing platform with all the benefits of the cloud, but entirely under your control. You can deploy Infinity in a multitude of ways, including in a cloud subscription on for instance Microsoft Azure, AWS, GCP or Oracle Cloud, or even on-premises if that is a requirement. Infinity can help you migrate to the cloud at your own pace. And of course, Infinity features all of the features that you have come to know from Pexip.

With Pexip Professional Services, a complex Infinity solution design can be captured accurately, quickly and cost effectively. Pexip will ensure the successful solution design, including integration with your video conferencing systems and call control through the use of its highly trained and experienced technical experts. A Pexip Professional Services Engineer will oversee the entire process for you.

Benefits

Quality – Every design is performed to exacting quality standards

Speed – Optimized solution design process

Value – A fixed-price, fixed-deliverables service

This service includes:

· An initial project kick-off meeting to discuss all deliverables and align key stakeholders
· Solution Design Workshop
· Comprehensive detailed low-level design technical document covering Management, Conferencing and Edge Nodes to be deployed within the customer-provided virtual infrastructure. It also includes provision for Microsoft Teams and/or Google Meet integration, VMR Scheduling for Exchange, One-Touch Join, Smart Scale and integration with ancillary services and other video conferencing call control platforms.
