Pexip Professional Services

Professional Services Subscription

Pexip Infinity is an award-winning, self-hosted, virtualised and distributed multipoint conferencing platform. It can be deployed in an organisation's own data centre, or in a private or public cloud such as Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP) or Oracle Cloud as well as in any hybrid combination. It enables scaling of video, voice and data collaboration across organisations, enabling everyone to engage in high-definition video, web, and audio conferencing.

Pexip Professional Services Subscription is a cost-effective and convenient way to ensure the customer's consulting needs on the Infinity collaboration platform can be met not only during the initial implementation but also throughout the year and every year. Professional Services Subscription brings peace of mind through predictable costs and maximised return on the investment with Pexip.

Professional Services Subscription is available in Basic, Enhanced and Premium packages depending on the customer's chosen software options. All packages represent a very substantial discount on the list price for Year 1 implementation activities and a significant discount on the ongoing support activities in the following years.

This subscription service includes:

- Program and project management
- Design
- Installation
- Executive business reviews
- Usage & adoption
- Training
- Support for major upgrades
- Expansion of capacity and extension of capability
- Health checks
- Critical meeting support
